No Irrigation outside your allotted time period. No Irrigation on Sunday Nights into Monday Mornings.				
<u>Maintenance (Wet Check) Only</u> April 1 thru October 31 – Mondays from 7 am to Noon November 1 thru March 31 - Mondays from 10 am to 5 pm				

**Block II is a second watering period per week and will be provided as needed on a seasonal basis. Irrigation should be set for both blocks which will automatically start when pumps are on for the second block.*

Suggested runtime times (per irrigation block)

Different types of sprinklers apply water to your lawn at different rates so their runtimes should be different. The following runtimes are based on the normal application rates for the different types of sprinklers.

15 minutes for spray head zones (10’ to 15’ radius “fan” type spray heads).

45 minutes for rotor zones (25’ to 30’ radius rotating stream).

22 minutes* for dripline zones (tubing in landscape beds). (* less for mature plants)

20 minutes** for bubbler zones (for trees). (** reduce to “0” minutes for trees planted more than six months)

Example: My address is 406, so I will program my irrigation controller to start an irrigation cycle on Fridays at 2:00 a.m. and Tuesdays at 10:00 p.m. My irrigation has six zones as follows:

Station (or Zone) Number	Type of Sprinkler (spray head, rotor, dripline, bubbler)	Runtime / Minutes per Irrigation Day
1	<i>spray heads</i>	<i>15</i>
2	<i>spray heads</i>	<i>15</i>
3	<i>rotors</i>	<i>45</i>
4	<i>spray heads</i>	<i>15</i>
5	<i>dripline (mature plants)</i>	<i>15*</i>
6	<i>bubblers (established trees)</i>	<i>0**</i>
